

Assignment: Proposal Outline

Due: By email, on Nov 10

The goal of this exercise is to "sell me" your proposal topic:

Assignment directions: Each student will submit an idea for a research proposal, explicitly describing the following:

- 1) The rationale: Big picture explanation of the need and implications for EBM of the proposed research.
- 2) The "working hypothesis": Question(s) to be tested and expected outcome(s) of the study (your predictions).
- 3) The approach: An abstract (250 words max) describing the proposed methods (when / how) for the study.

NOTE:

use "MARS4910 - proposal outline" as email title
